Whip Mix Introduces The Heat Zone

Louisville, KY: November 2009 – Whip Mix Corporation introduces The Heat Zone, a wax modeling tool heater that quickly and safely heats tools without a flame. It heats using an electromagnetic induction process, eliminating the threat of burns or fire associated with traditional Bunsen Burners. This means no gas lines required, making the unit mobile and operational anywhere an electric outlet is available.

The Heat Zone is energy efficient as power is used only at moment of heating and since there is no flame it heats the tool clean without carbon deposits that can transfer to a wax up causing a rough surface. The Heat Zone provides a safe, clean, convenient way to heat wax tools without compromising productivity.

The Heat Zone comes complete with 5 replaceable inserts that keep the unit clean of wax residue. Available in 115v and 220v and is covered by a two year warranty. For more information on The Heat Zone visit www.whipmix.com or call 800-626-5651.

Founded in 1919, Whip Mix manufactures Hanau™, Denar® and Whip Mix articulators, dental gypsums, investments, waxes, furnaces, ovens, mixing equipment and model trimmers for use in dental labs and dental offices.
