

3D PRINTERS

Introducing Whip Mix VeriEKO, the Asiga MAX UV and the Asiga Pro 4K — covering everything from entry-level to high-volume manufacturing.

3D PRINTING TODAY PRESENTS NEW CHALLENGES AND NEW OPPORTUNITIES.

WHIP MIX OFFERS CHOICES THAT ADDRESS EVERYDAY PRINTING CHALLENGES TO THE DENTAL LABORATORY AND THE DENTAL PRACTICE.

Whip Mix VeriEko and Asiga open-source material printers ensure consistent high accuracy with easy, fast material change and no calibration necessary. In addition, we research, develop, and manufacture a comprehensive line of print resins made to satisfy most every printing requirement.

WHIP MIX VERIEKO The small, but mighty LCD 3D printer

- Enables you to print extremely precise models, surgical guides, and dentures with thicknesses between 25-100 microns.
- It is an open system printer and is able to accurately print virtually any 405nm print resin using its advanced software and auto-calibration.

ASIGA MAX UV

A proven workhorse, a 3D printer which offers features seen only on more expensive printers

- It is extremely fast, accurate, and affordable.
- It is consistent and extremely efficient
- Prints models, surgical guides, splints, C&B, dentures, temporary C&B, RPD burnout patterns, and custom impression trays.
- The Asiga Max UV is available in 385nm wavelength.

ASIGA PRO 4K

The Pro 4K 80 combines proven industry-leading precision and a large build envelope with high-speed print capabilities.

- It is an open-system printer.
- Features system rigidity, repeatable performance and unmatched system build quality.
- A simple user interface controlled via a touch screen display or remotely via a web interface.
- High-power 385nm UV wavelength.
- Asiga's unique SPS™ process which guarantees every layer is formed accurately.

PRODUCT NUMBER	PRINTER	X/Y RESOLUTION	BUILD SIZE X, Y, Zmm	AVERAGE PRINT TIME*	AVERAGE NUMBER OF MODELS
79200	Whip Mix VeriEko	47 Microns	118, 66, 140	3 hours	6 Quads
71229	Asiga MAX UV	62 Microns	119, 67, 76	1.5 hours	6 Quads
71204	Asiga PRO 4K 80	80 Microns	217, 122, 200	1.5 hours	15-18 Quads

*Print speeds vary depending upon layer resolution and object height.
