

Occlusal Stand Instructions

- Set the model on the stand with the central incisors placed on the line etched on the front of the stand.
- Adjust the model on the stand to match the patient.

TIPS:

- This line will position the model at Bonwill.
- The stand tips 20° in all directions. Use the rotation of the stand to position the model until only fine tuning is needed.
- Turn the wheel to raise or lower the stand for fine tuning.
- You may need to use putty or impression material to create a base if the model does not sit flat.
